Advanced search

Using object links for search

Objects links can be used as search criteria.

Technology

On-premise or cloud

Supports multiple hosting options with a choice of on-premise or cloud deployment.

Separate database

To enable accelerated search queries, SAP data is indexed in a separate database – exclusively for search and analysis purposes.

Technology

Compliant data access

Provides comprehensive compliance support via all authorization checks implemented in SAP.

Support of single sign-on.

Setup and installation

CROSS-POINT is easy to configure and requires little maintenance support.

Summary

Simple deployment

Search in metadata and
file content

Modern and intuitive user
interface

Outstanding search speed

Easy to configure

Extended functionalities
for SAP ECTR
